

Bruno Lopes Bacelar

Senior Software Engineer / AI-Powered Product Development / Full Stack & Automation

Calgary, AB, Canada · +1 (403) 714-4572 · blbacelar@gmail.com

PROFILE

Senior software engineer with 20+ years building web applications, internal platforms, and workflow automation systems — now focused on AI product engineering. I design and ship AI-assisted applications and automation frameworks with TypeScript, React, Next.js, and Node.js, with deep experience integrating external services and turning operational problems into measurable business impact. Increasingly, my work looks less like QA and more like product: building the tools, pipelines, and AI workflows that teams actually run on. I also serve as CTO and shareholder of Olive Social Impact, leading technology strategy and platform development.

CORE SKILLS

AI & AUTOMATION

Prompt Engineering AI-Assisted Applications Workflow Automation n8n Claude OpenAI Tools
Structured Workflow Design

LANGUAGES & FRAMEWORKS

TypeScript JavaScript Node.js React Next.js HTML / CSS Tailwind CSS

BACKEND & DATA

REST APIs Firebase Supabase PostgreSQL API Integrations

DEVOPS & CI/CD

GitHub Actions Jenkins GitHub GitLab CI/CD Pipelines

TESTING & QUALITY

Cypress Playwright Selenium Appium Postman JMeter

PROFESSIONAL EXPERIENCE

Test Driven Solutions (TDS)

Apr 2025 – Apr 2026

QA Consultant / Automation Engineer

Remote

Delivered automation architecture, CI/CD improvements, and API-driven workflows within highly regulated financial and mortgage environments.

- Architected a reusable automation platform supporting multiple mortgage lender systems.
- Improved CI/CD execution efficiency by 62% through workflow optimization and pipeline improvements.
- Designed scalable API validation and automation strategies for compliance-focused applications.
- Developed automation frameworks supporting complex business workflows and financial systems.
- Collaborated closely with engineering and product teams to improve delivery reliability and release confidence.

Stack TypeScript · Cypress · Jenkins · GitHub Actions · REST APIs

Betr Inc.

May 2023 – Jan 2025

Full-Stack Developer / QA Engineer

Remote

Built internal products, operational platforms, workflow automation systems, and engineering-productivity tools for a fast-growing sports-technology startup.

- Designed and built a custom issue-management platform using Next.js, TypeScript, and the Jira APIs, reducing issue-resolution time by 30%.
- Built internal dashboards and workflow tools in Retool to improve operational visibility and team efficiency.
- Developed a Slack-based access-management solution that automated permission verification and eliminated manual review.
- Implemented backend integrations and workflow automation supporting engineering and operational teams.
- Contributed to performance and reliability initiatives for high-traffic betting platforms, and integrated deployment workflows into GitHub Actions and Jenkins.

Stack Next.js · React · TypeScript · Node.js · Jira APIs · Retool · Slack APIs · GitHub Actions

FansUnite Entertainment

Dec 2021 – May 2023

QA Engineer / Automation Engineer

Remote

Led automation initiatives supporting React-based operational platforms.

- Expanded automated coverage from 20% to 80% across critical business systems.
- Reduced regression testing effort by 60%.
- Developed reusable automation frameworks and testing infrastructure.
- Collaborated with product and engineering teams to improve delivery quality and release confidence.

Stack React · Automation Frameworks · CI/CD

AI PRODUCT DEVELOPMENT

Diário de Bordo Production Deployment

- Designed and deployed an AI-assisted content publishing platform for a client organization.
- Built workflow automation supporting content creation and publishing processes.
- Integrated LLM-powered content generation into a real-world production application.
- Developed with Next.js, TypeScript, and modern web technologies.

Stack Next.js · TypeScript · LLM Integration

Content Spark AI-Powered Content Workflow Platform

- Built an AI-powered content workflow platform for content ideation, organization, and publishing.
- Designed prompt-driven workflows and structured content-generation processes.
- Implemented AI-assisted user experiences and automation workflows.

Stack Next.js · TypeScript · AI Workflows

Olea Connect CTO & Shareholder

- Leading platform architecture and product development for a membership and community platform.
- Owning technology strategy, platform development, integrations, and future AI-assisted capabilities.
- Collaborating directly with leadership on product vision and execution.

Stack Next.js · TypeScript · Platform Architecture

SELECTED PROJECTS

Store Admin Platform Content management & client operations

- Designed reusable admin workflows and dashboard experiences built with Next.js, React, and TypeScript.
- Focused on scalability, maintainability, and operational efficiency.

Stack Next.js · React · TypeScript

Netto Link Tree Mobile-first creator & marketing platform

- Built a high-performance, mobile-first platform optimized for conversion and speed using Next.js, React, TypeScript, and Tailwind CSS.

Stack Next.js · React · TypeScript · Tailwind CSS

EARLIER EXPERIENCE

QA Engineer · Curatio

2018 – 2021

- Built Appium-based mobile automation solutions for iOS and Android applications.
- Developed QA processes, documentation, and testing standards; mentored junior team members and supported release-quality initiatives.

System Analyst / Software Developer · Adapcon

2002 – 2016

- Developed ERP and business-management systems across healthcare, manufacturing, and finance.
- Built integrations, operational tools, and business-critical software, working directly with stakeholders to translate requirements into products.

EDUCATION

Web Development & Mobile Applications

Cornerstone International Community College (CICCC), Vancouver

Bachelor of Business Management

Senac Brasil

Information Technology

Nova Era, Brazil

STRENGTHS

- 20+ years building software across multiple industries
- Startup and remote-first engineering experience
- Product-oriented mindset with strong ownership and execution
- Collaborates across Product, Design, Engineering, and Operations
- Learns new technologies and delivers value quickly
